Cost (Excl. Tax)	56 000 000 € HT
Studies period	2014
Delivery	2017

Description

The project involves the complete refurbishment of an existing building (seven floors and a basement level) with the creation of a second basement to provide a 8,300 m²- closed-off area.

The existing building is not an historical building, but it has an undeniable heritage value (decorated facades, grand detailings) and is located in an protected area.
